OBJECTIVE:

Computer Science student seeking internship opportunity to utilize and develop skills in software engineering, development, and design

EDUCATION:

Aurora University — Aurora, IL

Expected Graduation: Spring 2028

B.S. in Computer Science & B.S. in Cybersecurity (Double Major) | GPA: 4.0 / 4.0

Relevant Coursework: Data Structures, Web Application Development, Computer Systems Architecture, Operating Systems Administration, Object-Oriented Design & Development, Intro to Cybersecurity

TECHNICAL SKILLS:

Languages: Java, C, C#, JavaScript, HTML, CSS, Python, Bash, SQL

Tools & Platforms: Git, Linux, Docker

Security & Networking: Firewalls (UFW), VPN, SSH

PROJECTS:

Self Hosted AI News API / Website:

Ollama, Java, HTML, CSS, JavaScript

- Scraped the HTML of given websites using Jsoup and summarized each article with a local Ollama AI model
- Built a Java HTTP API that serves the summaries to a webpage, where each summary gets its own div

Raspberry Pi Proximity Sensor:

Raspberry Pi, GPIO, Python, AI assistance

- Built a working proximity sensor in a class group project, wiring components to the Raspberry Pi's GPIO pins and programming it in Python
- Learned hardware and wiring skills and how to work effectively with AI to deliver a functioning project in limited time

Home Server:

Linux, SSH, Networking

- Built a private home media server that stores files and movies, accessible from anywhere only by me through a VPN
- Assembled a working computer from spare parts and set it up as a server running Ubuntu Linux Server
- Configured the UFW firewall to allow access only to select groups

EXTRACURRICULAR ACTIVITIES:

- Member, Computer Science Club, Aurora University (2025 - Present) — attended Professor Petkas' presentation on locally hosted AI
- Varsity Wrestling, Aurora University (2025 - Present) — balance competitive collegiate athletics and a demanding training schedule with a full double-major course load while maintaining a 4.0 GPA
